Career Summary So Far

Aspiring Full Stack Web Developer with a strong foundation in HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, and modern web development practices. Over the past months, I have actively built multiple real-world projects including a student resource portal, real-time chat application and AI-powered virtual assistant. Through continuous self-learning, hands-on experimentation, and executing academic projects, I have strengthened my understanding of frontend development, backend API design, authentication, database management, deployment, and version control. I consistently focus on writing clean, maintainable code and improving my problem-solving skills.
